

AgriSarathi Authentication & Security Verification (Week 6)

Intern ID: BhumikaBahuguna | Week 6

1. Protected Route Guard (Redirect)

Description: Accessing the protected '/dashboard' route directly while unauthenticated results in an automatic redirect to '/login'. The frontend route guard checks the state context and intercepts the unauthorized session.

AgriSarathi Authentication & Security Verification (Week 6)

2. User Registration (Password Hashing via bcrypt)

Description: The registration form accepts email, password, and name. Submitting this sends the data to '/api/auth/register'. The backend
